Instruction for Colonoscopy with Movie Prep-Evening Before

1. **Medication:** Please notify us if you are on the following medications: **Plavix, Aggrenox, Coumadin, Warfarin, Pradaxa, Effient or Xarelto.** You may need to stop these medications 5 days prior to your procedure. **Lovenox or Fragmin** should not be used the day of the procedure. If you are Diabetic, please consult your primary care physician regarding your medication and diet. You may continue to take all other medications. Please call our office with any questions you may have.
2. **Liquid Diet:** The day before the procedure consume **CLEAR LIQUIDS ONLY. DO NOT EAT ANYTHING! Avoid dairy products and anything with red food coloring or red dye!!** Drink plenty of fluids all day. Examples of clear liquids include: **Bouillon, Broth, Tea, Jell-O, Soda, Gatorade, Popsicles, Fruit Juice with out pulp, or Coffee without cream.**
3. **Transportation:** Taxicabs are not acceptable. You must have someone you know drive you home. From the time you arrive at our facility until the time you leave may require 2 to 3 hours.
4. **Additional Instructions:** Prepare the first dose of **MoviPrep** in the morning and keep it in the refrigerator (it tastes better chilled). You will begin your first dose at approximately **__ :00 PM.** When finished with the first dose, mix the second dose and refrigerate. You will begin the second dose at approximately **__ :00 PM.** Also, please drink 16 oz. of any clear liquid with each liter of your prep to ensure adequate hydration. Please see the attached instruction sheet. If you have a later morning procedure time, you may have 8 oz. of a clear liquid. **You should not have anything 4 hours prior to your procedure.**
